PREMIUM-LOAD

Centro produzione automatico lame circolari

La flessibilità, Hi-Tech Solution

Alta tecnologia per una continua evoluzione del processo della lavorazione dell'utensile

PREMIUM-LOAD is designed for response of high necessities for circular saws production and grinding services. Our new generation machines minimize human labor; which robot loading system and in compact central body, face and top grinding machine are together. With high efficiency, loss of time in your workshop is prevented. Free programming for cold saw blades also enables the machine to make production for metal blades. The machine has a wide production capability of wood and metal blades.

PREMIUM-LOAD, for all teeth form of carbide circular saws in only one pass, ensure a perfect and top quality level grinding. Integral measuring probe enables high precision operation.

General Features

- 3 carriages for loading and unloading.
- Complete top and face grinding in one cycle.
- 8 axes Servo motor CNC controlled.
- Loading and Unloading by 4 magnetic grippers.
- Repairing the newly-replaced teeth.
- Application of two grinding wheels.
- Optional Hollow Tooth Grinding Attachment
- Optional D axis driven by servo motor for face beveled blades.
- Optional Chip Breaker Attachment.
- Manual D axis for manually adjustable head level.
- Operating screen in any language.
- High performance periphery grinding technology.
- PC controlled.
- Windows® operating system.
- Possibility of selecting the grinding program from the control panel.
- Grinding all common tooth types in one cycle.
- Integral measuring probe.
- Automatic saw blade thickness calculation either by means of measuring probe or manually entering on the control panel.
- Automatic compensation calculation by means of the measuring probe.
- Automatic kerf thickness calculation by means of a measuring probe.
- Face and top angle data collection by means of measuring probe.
- 15" touch screen control panel.
- Max. outside diameter Ø610mm.
- Pneumatic blade clamping.
- Totally enclosed cabin for operator safety.
- Simple controls for ease of use.
- Rigid base.
- Variable grinding speed.
- Ergonomic cabin construction for ease of loading and unloading.
- Independently adjustable grinding and indexing speeds.
- Integral air suction unit.
- Oil coolant ready.
- Production conformed with CE standards.

Become independent ! Optimum use of the unique grinding machine and the most operator-friendly control system. Special high speed set-ups can give “off-carbide” grinding time which increase productivity without depending on grinding accuracy or wheel life. ABM Control system eases the grinding operations while increasing your quality.

Technical Specifications

- Circular saw outside diameter $\varnothing 150-610\text{mm}$
- Post diameter $\varnothing 30\text{ mm}$ (Replaceable posts)
- Loading Carriage 3 Carriages
- Loading Capacity 50 Saw Blades
- Air Pressure Required Minimum 6 Bars
- Cutting angle $(-7^\circ) - (+45^\circ)$
- Max. Tangential angle $+25^\circ$
- Grinding wheel outside diameter $\varnothing 160\text{mm}$
- Grinding wheel bore diameter $\varnothing 32\text{mm}$
- Working speed Variable from 0,5mm to 20mm/s
- Coolant motor capacity 55lt/min.
- Coolant tank capacity $\sim 120\text{lt.}$
- Feeding rate 0-25 teeth/min.
- Motor quantity 11
- Connected load $\sim 6.8\text{kW}$
- Voltage 380V, 3Ph
- Net/gross weight 4200/4300kg
- Dimensions 710*250*240cm.

Optional Module for Production of Cold Saw Blades (Cermet)

Optional Free Profile Programming of Cold Saw Blades

At ABM, we develop our machines, our own electronic systems and application software and manufacture all main mechanical components. finally, we assemble and test the final product to global machine standards. Whichever ABM machine you choose for your grinding, you will know that it is built to meet the all market demands.
